

# ENERGY METABOLISM

## Weight Management

Cell Activator is a special formula which supplies the body with B-vitamins (B1, B2 and B6), plus the essential minerals, manganese and copper for normal energy metabolism and zinc for normal carbohydrate metabolism.

### KEY BENEFITS

- Rich in B vitamins to help unlock the energy in foods.
- Contains zinc for normal energy metabolism.
- Daily support for cells energy production and protection from oxidative stress.

### HOW CAN IT HELP YOU?

The minerals zinc, copper and manganese help protect the cells from oxidative stress, therefore, taking a food supplement such as Cell Activator may offer support for hectic lifestyles.

### USAGE

Take one capsule three times per day.

### ALSO TRY

A low calorie caffeineated effervescent energy drink, with added vitamins B and C, Liftoff can help increase alertness and improve concentration.
